INDEX TO ILLUSTRATIONS.

Amenthes and Thoth—Curves of Visibility..... 259
Astronomy—Orthographic Projection in Teaching.....237, 238
Aurigae, Light Curve of Y..... 275
Brontes, A Study of Martian "Canal" Development—Plate I op..... 1
Diagram showing South Development..... 5
Calculus Illustrations 250
Canals of Mars Photographed..... 483
Comet Brooks' New and Old Orbits..... 184
Passage through Jupiter's Satellite System..... 183
d 1904, Orbit of..... 164
e 1904 (Borrelly) Orbit of—Plate III op..... 117
a 1905, Orbit of..... 271
Common Reflecting Telescope at Harvard, The 60-inch—Plate II op..... 59
Second View..... 107
Constellations.....45, 95, 155, 212, 268, 335, 402, 461, 509, 563
Corona Photographed at Vinaroz, Spain..... 575
Coronae, Distance Curve of A. B. Tau..... 331
Cygni, Light Curve of VX..... 340
Diazenital Illustrations 17, 18
Differential Method Applicable to Solutions Proceeding by Successive Approximations 371, 372
Eclipse of August 29-30, 1905, Path of Total Solar..... 41
March 5, 1905, Path of Annular..... 40
Sun as Visible in the United States..... 135
Graff's Variable Star Charts.....515, 516, 517
Herculis, Light Curve of RX..... 410
Jupiter, Drift of Red Spot in 1879-1904..... 28
Equatorial Belt of.....22, 23
Rotation Periods of.....25, 27
in 1905, The Satellites of..... 46
Large and Small Magellanic Clouds, Plate VI op..... 417
Leonids Charted at Drake University by E. A. Fath..... 55
Light Curve of Y Aurigae..... 275
VX Cygni 340
RX Herculis 410
Beta Lyrae 275
Mars by Gerald H. Lepper..... 131
Mira, Minimum of..... 339,
Neptune's Path among the Stars during 1905..... 96
Occultation of the Hyades, Dec. 10, 1905..... 564
Perseids of August, 1904, Charted by R. M. Dole..... 347
Physics of Shooting Stars by J. F. Lanneau.....435, 436, 437, 441, 442

Planet Movements during 1905 (Venus, Mercury and Neptune)..... 43
(Uranus, Saturn, Jupiter and Mars)..... 44
Polaris Vertical Circle Method of Obtaining Time with Surveyor's Transit 501
Position Angle Curve of Tau Coronae..... 332
Region following Delta Ophiuchi—Plate VII op..... 353
Relation of Sun's Figure to Number of Sun-spots..... 478
Saturn's Satellites.....46, 403, 462, 511
Solar Eclipse Sketched by M. Moye—Plate VIII op..... 475
Star having Large Proper Motion, A. G. C. 6886..... 505
Sun-spot of February, 1905—Plate IV op..... 175
System of Castor..... 88
Tacchini, Pietro—Plate V op..... 287
Time of Moonrise, Plate IX op..... 531
Unusual Discoveries of Variable Stars..... 450
Variability and the Asteroids..... 383
Variable in Andromeda, Vicinity of..... 274

GENERAL INDEX TO VOLUME XIII.

Aberration, Planetary, Roberdeau Buchanan..... 376
Accurate Time Pieces, Note..... 280
Agathocles, Eclipse of—W. T. Lynn..... 201
Simon Newcomb 199
Aitkin, R. G., On Double Stars..... 65
Orbit of Beta 395 equals Ceti 82..... 190
Aldebaran, Dec. 20, 1904, Occultation of—Herbert A. Howe..... 108
Algebra, Advanced—Hawkes..... 582
An Examination of the Modern Views as to the Real Nature of the Markings on Mars, Gerald H. Lepper..... 130
Angle Measuring Instruments, Notes on—F. E. Harpham..... 149
Applicability of the "Short Method of Determining Orbits from Three Observations," A. O. Leuschner..... 296
Approaching Oppositions of Mars, Roberdeau Buchanan..... 137
Approximate Magnitudes of Variable Stars 48, 103, 163, 215, 276, 345, 407, 464, 519
Aquilae, Note on Delta..... 273
Asteroid and Comet Notes.....53, 97, 213, 269, 336, 566
Asteroids, New.....53, 213, 273, 351
Variability and the—Grace Agnes Thompson..... 378
Astronomers of Today and Their Work by Macpherson, Note..... 284
Astronomical and Historical Chronology by Jordan, R. W. McFarland..... 112
Phenomena during 1905, H. C. Wilson..... 39
Astronomy, Fireside Note..... 58
in the High School, Mary E. Byrd..... 545
Spectroscopic Work for Classes in—Sarah F. Whiting..... 387
Use of Graphs in Teaching—Sarah F. Whiting..... 185
Photographs in Teaching—Sarah F. Whiting..... 430
A Three-Inch Telescope, William Strong..... 203
Atmosphere, The—O. J. B. Cordeiro..... 384
Aurigae, Variable Star Y..... 275
Ayer, John E., Gravitation. Note..... 170
Baker, Todd and, Predictions of Eclipse of August 30, 1905..... 241
Bartlett, Arthur K., The Heavens in Winter..... 30
B. A. S. Meeting in South Africa. Note..... 226
Beauty of the Fall Evening Skies. Note..... 582
Blakeslee, T. L., The Law of the Lanes. Note..... 111
Book Notices, Analytic Geometry, Smith and Gale..... 173
Astronomers of Today, Hector Macpherson, Jr..... 284
Astronomical and Historical Chronology, Jordan..... 112
Fireside Astronomy, D. W. Horner..... 58
Gravitation, John E. Ayer..... 170
Halley's Comet, Eugene Fairfield McPike..... 415
Portratgallerie der Astronomischen Gasellschaft..... 110

Road-Book to the Stars, T. E. Heath..... 350
Bridges, Robert, Sonnet to the Astronomer..... 172
Brightness of Stars, Relative—Note..... 283
Brontes, A Study in Martian "Canal" Development—Percival Lowell..... 1
Bruce, Robert E., Notes on Sun-spots..... 82
Buchanan and the Doctrine of Limits, J. Morrison..... 472
Roberdeau, An Introduction to the Differential Calculus by Means of Finite Differences.....245, 309
Elongations of Mercury in 1905. Note..... 281
Planetary Aberration 376
The Approaching Oppositions of Mars..... 137
Semi-Diameter of the Planets..... 209
Visual Brilliancy of the Planets..... 175
Buck Leaves Iowa College, Professor S. J. Note..... 522
Burnham's Double Star Observations at the Cape of Good Hope..... 333
Burnham, S. W., Double Star Observations at the Cape of Good Hope..... 333
New Double Star Measures..... 15
Recent Lick Observatory Work..... 473
Burnham's Double Star Work. Note..... 53
Byrd, Mary E., Astronomy in the High School..... 545
Calculus, An Introduction to the Differential—Roberdeau Buchanan.....245, 309
Campbell, W. W., Castor, A Quadruple Star..... 87
Canals of Mars, Photographed, Percival Lowell..... 479
Carnegie Institution has New President. Note..... 109
Castor, A Quadruple Star, W. W. Campbell..... 87
Chart of Faint Stars Visible at the Lowell Observatory, P. Lowell..... 391
Comet and Asteroid Notes.....53, 97, 213, 269, 336, 404, 566
Encke 53
1873 II Temple2..... 53
Ephemeris of 97, 98
Search Ephemeris of..... 271
1903 III, Definitive Orbit of..... 336
1904 I, Ephemeris of 98, 337
II, (1904 *d*).....99, 165, 338
e 100, 166
1905 (Giacobini).....269, 270, 271
Schaer Discovered 566
Comets, Possible Effects of Radiation on the Motion of—Note..... 282
Velocity of—John B. Wood..... 140
Visible in 1905..... 47
Common's 60-Inch Reflecting Telescope. Note..... 106
Edward C. Pickering..... 70
Communication about the Diazenital, Fr. Nusl and Josef Fric..... 16
Constant Error in Meridian Observation, Jermain G. Porter..... 117
Construction of Large Telescope Lenses, C. Faulhaber..... 534
Copeland's Death, Ralph..... 572
Cordeiro, O. J. B., Gravitation..... 8
The Atmosphere 384
Cygni, Light Curve of VX. Note..... 340
Note on SS..... 105
Davis, Herman S., Brilliant Meteor. Note..... 525

Flamsteed and Piazzi Indentities..... 423
Denning, W. F., Meteoric Observations. Note..... 107
Determining Longitudes of Jupiter. Note..... 513
Diazenital, Communication about—Fr. Nusl and Josef Fric..... 16
Differential Method Applicable to Solutions Proceeding by Successive Approximations, etc., Herbert L. Rice..... 370
Dole, Robert M., The Perseids of August, 1904..... 347
Doolittle, Eric., A Lost Double Star..... 398
Double Star, A Lost—Eric Doolittle..... 398
Measures, New—S. W. Burnham..... 15
Observations at Cape of Good Hope. S. W. Burnham..... 333
Double Stars, On—R. G. Aitken..... 65
One Hundred New. Note..... 223
Earth's Heat Caused by Radium. Note..... 226
Eclipse of Agathocles—W. T. Lynn..... 201
Simon Newcomb..... 199
Expedition, M. Proctor..... 90
August, 1905. Note..... 225
Visible in the United States. Rigge, S. J..... 134
Predictions for—Todd and Baker..... 241
Reports of..... 473, 491, 523
Viewed at Alcala de Chisvert, M. Moye..... 523
in Scotland, H. Macpherson, Jr..... 523
Observed at Burgos, Spain, Charles P. Howard..... 542
by Stone at Charlottesville, Va..... 574
at Vinaroz..... 575
Eclipses during 1905 and Their Circumstances. Note..... 39
Elements of Recently Discovered Minor Planets..... 567
Elliptic Motion, Asaph Hall..... 287
Ephemeris for Physical Observations of Moon, 1906..... 572
Equinoxes of the Planets. Note..... 222
Eros Photographed at Arequipa, Edward C. Pickering..... 350
Fath, E. A., Leonids Observed at Drake University. Note..... 54
Faulhaber, C., Construction of Large Telescope Lenses..... 534
February Sun-spots. Note..... 168, 194
Ferris' Descriptive Geometry. Note..... 526
Figure of the Earth. Note..... 223
Finite and Infinite. Note..... 583
Flamsteed and Piazzi Indentities, Herman S. Davis..... 423
Fric, Fr. Nusl and Josef, Communication about the Diazenital..... 16
Geminorum U. Note..... 106
General Notes..... 53, 106, 167, 222, 280, 346, 412, 471, 522
Geometry, Analytic, Smith and Gale. Note..... 173
Ferris' Descriptive. Note..... 526
Good Books on Astronomy. Note..... 580
Good Hope, Double Star Observation at the Cape of—S. W. Burnham..... 333
Gravitation, O. J. B. Cordeiro..... 8
Graff's Variable Star Observations at Hamburg, with Charts..... 514
Graphical Calculus. Note..... 581
Gravitation, John E. Ayer. Note..... 170
Great Sun-spot of February, 1905, Th. Moreux..... 194

Hadden, David E., Solar Observations in 1903 196
Hadley, Stephen Marshall, Relative Masses of Binary Stars 260, 323
Hale at R. A. S. Meeting, G. E. Note 577
Hall, Asaph, Elliptic Motion 287
The Determination of Orbits 353
Halley's Comet, Eugene Fairfield McPike 471
History and 1910 Return of. Note 415
Harpham, F. E., Notes on Angle Measuring Instruments 149
Heath, T. E., A Red-Book to the Stars 350
Hill, George A., An Untried Method of Determining the Constant of Refraction 417
The Requisites of a Transit Observer 362
Horner, D. W., Fireside Astronomy. Note 58
Hough, G. W., Our Present Knowledge of the Condition of the Surface of Jupiter 19
Howard, Charles P., Solar Eclipse Observed at Burgos, Spain 542
Howe, Herbert A., Occultation of Aldebaran, Dec. 20, 1904. Note 108
Hydrae, Note on—R—Rose O'Halloran 469
V— 470
Important Articles in Recent Publications. Note 583
Ives Replicas of Rowland's Diffraction Gratings. Note 228
James, G. O., On the Polaris Vertical Circle Method of Obtaining Time with the Surveyor's Transit 499
Jordan's Astronomical and Historical Chronology, R. W. McFarland 112
Jupiter, Different Methods of Determining Longitudes on—Note 229
Present Knowledge of Condition of the Surface of—G. W. Hough .. 19
Jupiter's Satellites, Phenomena of 511, 565
Seventh Satellite, Note and Elements 225, 413
Sixth Satellite, Note 106, 413
Jourdain, Phillip E. B., Some New Results with Respect to the Principle of the Conservation of Energy 36
Lanneau, J. F., Physics of Shooting Stars 434
Law of the Lanes, T. M. Blakeslee. Note 111
Lawrence Fellowship Founded by Percival Lowell 350, 415
Level of Sun-spots, Walter M. Mitchell 392
Leonids observed at Drake University 54
Harvard College 54
Providence 54
University of Illinois 55
Lepper, Gerald H., An Examination of the Modern Views as to the Real Nature of the Markings on Mars 130
Leuschner, A. O., On the General Applicability of the "Short Method of Determining Orbits from Three Observations" 296
Lick Observatory Work, Recent—S. W. Burnham 473
Longitudes on Jupiter, Different Methods of Determining. Note 229
Lowell, Percival, Brontes, A Study in Martian "Canal" Development 1
Canals of Mars Photographed 479
Chart of Faint Stars Visible at Lowell Observatory 391
On the Kind of Eye Needed for the Detection of Planetary Detail 92
The Thoth and the Amenthes 251

Lost Double Star, A—Eric Doolittle..... 398
Lunar Crack in the Valley of the Alps, William H. Pickering..... 64
Lundin made M. A., C. A. R. Note..... 414
Lynn, W. T., The Eclipse of Agathocles..... 201
Lyrae, Light Curve of Beta..... 275
Note on W—Rose O'Halloran.....105, 470
Macpherson, Junior, Hector—Pietro Tacchini..... 306
Solar Eclipse, Note..... 523
Macpherson's Astronomers of Today and Their Work. Note..... 284
Mars, William H. Pickering..... 305

Approaching Oppositions of—Roberdeau Buchanan..... 137
Photographed, Canals of—Percival Lowell..... 479
Martian "Canal" Development, Brontes, A Study in—Percival Lowell..... 1
Snows, William H. Pickering..... 196
Mathematical Progress in America. Note..... 229
Teaching, Movements in—David Eugene Smith..... 205
Maunder, E. Walter, Solar Origin of Terrestrial Magnetic Disturbances.... 59
McFarland, R. W., Astronomical and Historical Chronology by Jordan..... 112
Miscellany..... 531
McPike, Eugene Fairfield, Halley's Comet. Note..... 471
Maxima and Minima of Long Period Variables. Note..... 339
Mechanical Science, Some Refinements of—Note..... 415
Medals for 1904, Royal Society. Note..... 172
Mee, Arthur, "Thomas William Webb"..... 138
Mercury in 1905, Elongations of—Roberdeau Buchanan. Note..... 281
Meridian Observations, Constant Error in—Jermain G. Porter..... 117
Meteor, Brilliant—Herman S. Davis. Note..... 525
Showers for 1905. Note..... 48
Meteoric Observations, W. F. Denning. Note..... 107
Meteors of November, 1904, Edward C. and William H. Pickering..... 56
Method of Determining the Constant of Refraction, An Untried—George A. Hill 417
Missing Stars. Note..... 275
Mitchell, Walter M., The Level of Sun-spots..... 392
Moonrise, Time of—William F. Rigge, S. J..... 550
Morrison, J., Mr. Buchanan and the Doctrine of Limits..... 472
Motion, Elliptic—Asaph Hall..... 287
Movements in Mathematical Teaching—David Eugene Smith..... 205
Moreux, Th., Great Sun-spot of 1905..... 194
Moye, Marcel, Total Solar Eclipse. Note..... 523
Naked Eye Sun-spot Observation. Note..... 573
Naval Observatory Eclipse Program..... 526
Time Signal, May 3, 1905. Note..... 280
New Year's Eve. Note..... 143
Negative Enlargements, Walter Zimmerman.....484, 556
Newcomb, Simon, On the Eclipse of Agathocles..... 199
New Double Star Measures, S. W. Burnham..... 15
Notes, Book.....58, 110, 112, 170, 225, 415, 581, 582, 583
Comet and Asteroid.....53, 97, 213, 269, 336, 404

General.....53, 106, 167, 222, 280, 346, 412, 471, 522
On Angle Measuring Instruments, F. E. Harpham..... 149
Sun-spots, Robert E. Bruce..... 82
Planet.....44, 94, 154, 211, 267, 335, 401, 461, 509, 562
Publisher's.....58, 115, 174, 230, 286, 416, 474, 530
Variable Star.....48, 100, 156, 214, 273, 338, 405, 463, 512
Nova Aquilae, No. 2, Edward C. Pickering..... 471
Nusl and Josef Fric, Fr., Communication about the Diazenital..... 16
Observation of Variable Stars, One the—Paul S. Yendell..... 453
Observatory, Solar. Note..... 223
Occultation of the Hyades, Dec., 1905..... 564
Occultations visible in Washington.....42, 97, 156, 212, 269, 336, 403, 462, 510, 564
O'Halloran, Rose, Variable Star Notes..... 469
Old Testament Astronomy, Schiaparelli on—Note..... 171
On the Kind of Eye Needed for the Detection of Planetary Detail, Percival Lowell 92
Making Negative Enlargements, Walter Zimmerman.....484, 556
the Polaris Vertical Circle Method of Obtaining Time with Surveyor's Transit, G. O. James..... 499
Orbit of Beta 395 equals Ceti 82, R. G. Aitken..... 190
Orbits from Three Observations, On the General Applicability of the "Short
of Visual Binaries Catalogued. Note..... 573
Method of Determining." A. O. Leuschner..... 296
The Determination of—Asaph Hall..... 353
Orionis, Note on V—Rose O'Halloran..... 469
Oscillations of Solar Activity and Climate..... 576
Our Present Knowledge of the Condition of the Surface of Jupiter, G. W. Hough 19
Payne, William W., Photography and the Figure of the Sun..... 475
Recent Discoveries of Satellites by American Astronomers 120
To Care for a Telescope..... 506
Perrine Married, C. D. Note..... 414
Perrine's Discovery of the Sixth Satellite of Jupiter. Note..... 106
Perseids of August, 1904, Robert M. Dole..... 347
Perseid Shower Radiant, Weston Wetherbee. Note..... 167
Phases of the Moon..... 42
Phenomena during 1905, Astronomical—H. C. Wilson..... 39
Photographs in Teaching Astronomy, The Use of—Sarah F. Whiting..... 430
Photography and the Figure of the Sun..... 475
to Astronomical Research, Reflections Suggested by the Applications of—H. H. Turner.....72, 122
Physical Observation of the Sun Ephemeris of..... 96
Physics of Shooting Stars, J. F. Lanneau.....434
Pickering, Edward C., A. G. C. 6886 Star having Large Pproper Motion..... 503
Astronomical Telegrams direct from Harvard. Note 281
Common's 60-Inch Telescope..... 70
Eros Photographed at Arequipa. Note..... 350
Nova Aquilae, No. 2..... 471
The 24-Inch Reflecting Telescope. Note..... 224

Variability and the Asteroids, Grace Agnes Thompson..... 378
Variable Star Observations at Hamburg, by Graff..... 514
Approximate Magnitudes 48, 103, 163, 215, 276, 345, 407, 464, 519, 569
Maxima of UY Cygni.....103, 164, 217, 280, 343, 410, 464, 518, 571
RZ Lyrae...51, 102, 161, 217, 280, 343, 410, 468, 519, 568
Y Lyrae.....51, 105, 164, 218, 279, 346, 410, 463, 520, 571
U Pegasi 569
Minima of Variables of the Algol Type.....
.....50, 101, 216, 277, 344, 405, 465, 570
of Short Period not Algol Type.....
49, 104, 162, 214, 278, 341, 408, 467, 521, 568
New Andromedae.....52, 157, 274, 338
Aurigae 339, 511
Aquilae.....273, 411, 513
Camelopardalis 52, 218
Cassiopeiae.....52, 157, 274, 338
Cephei 52, 471, 571
Cygni 156, 412
Draconis 52, 157, 218, 412
Geminorum 411
Lyrae 339, 512
Mira (*o* Ceti)..... 339
Monocerotis 274
Ophiuchi.....357, 412, 513
Orionis 52, 157
Persei 100, 411
Sagittae 411
Sagittarius 51, 156, 221
Scorpius 156, 218
Taurus 338, 513
Ursæ Majoris..... 82
Virginis 470
Nomenclature of Newly Discovered..... 158
Notes on.....48, 100, 156, 214, 273, 338, 405, 463, 512, 568
Numbering New 567
Variable Stars at Harvard Observatory, Unusual Discoveries, Grace Agnes Thompson 445
Observations of—Paul S. Yendell..... 453
Velocity of Comets, John B. Wood..... 140
Virginis, Note on Y—Rose O'Halloran..... 469
Visual Brilliancy of the Planets, Roberdeau Buchanan..... 175
Washington Reduction Tables Published. Note..... 522

Webb, Thomas William, Arthur Mee..... 138
Wetherbee, Weston, Radiant of the Perseid Shower..... 167
Whiting, Sarah F., Spectroscopic Work for Classes in Astronomy..... 387
Use of Drawings in Orthographic Projection and of Globes in Teaching Astronomy..... 235
Graphs in Teaching Astronomy..... 185
Photographs in Teaching Astronomy..... 430
Wilson, H. C., Astronomical Phenomena during 1905..... 39
Planet Notes.....44, 94, 154, 211, 267, 335, 401, 461, 509, 562
Variable Stars.....48, 100, 156, 214, 273, 338, 405, 463, 512, 568
Wislicenus, Editor Jahresbericht. Note on death of..... 523
Wood, John B., Velocity of the Comets..... 140
Woodward made President of the Carnegie Institution, Dr. R. S. Note.... 109
Yendell, Paul S., On the Observation of Variable Stars..... 453
Young, Anne Sewell, Sun-spot Observations, 1904..... 168
Honored, Professor C. A..... 346
Retirement of Professor C. A. Note..... 111
Zimmerman, Walter, On Making Negative Enlargements.....484, 556
